

FIND YOUR HIDDEN CASH

## Accelerated Mortgage Payoff- Part 3 Average Daily Balance <br> Keep Your Dollars Working 24/7

© CashMap Consulting, LLC 2019

## Scenario Overview

- 375K Mortgage at 4.5\% for 30 Years;
- \$6,946.68 deposited each month;
- \$6,447.85 in monthly expenses;
- \$498.83 left after bills are paid and;
- \$10K in savings.

## 30 Year \$375K Loan at 4.5\%

- Over 30 years, payments will total \$684,025;
- Interest payments will total \$309,025;
- Additional payments shorten the loan's life and;
- Half of the loan will be paid in 19.75 years;

## Average Daily Balance

- Used to pay us and to charge us interest;
- We're not taught its implications on managing cash;
- Sum of each day's balance divided by days in the month;
- Goal is to optimize the average daily balance and;
- Deposit money early \& pay expenses at the end;

## Let's Start with a Savings Account

198\% Greater!

## Implications

- The greater the average daily balance the better;
- The percent difference is big but dollars are small;
- When managing debt, the dollar difference is big;
- With debt, the goal is to minimize the ADB and;
- Provides us a unique opportunity.

## Traditional Use of a Line of Credit

5.00\% Interest Rate \& Interest Paid

## Our Opportunity

Withdrawing the $\$ 2,519$ costs us just \$.79;

- Applying it to our mortgage saves us $\$ 6,545$;
- Using our income reduced our LOC cost by 92.4\%;
- We're using income to refinance debt;
- One caution - know your LOC's billing cycle.

## The Interest Rate Doesn't Matter!

At 5 percent our cost is just \$.79;

- At $10 \%$ our cost will be $\$ 1.59$;
- At $15 \%$ our interest cost increases to $\$ 2.38$;
- At 20\% our interest cost increases to \$3.18!
- A low average daily balance of $\$ 190.77$ is the key.

## Over 12 Months, would you . . .

- Spend $\$ 130$ to make $\$ 20,537$ in principal payments:

1. paying an additional $\$ 12,995$ in principal;
2. enabling you to pay off the loan 21 months earlier;
3. saving $\$ 26,878$ in interest payments and;
4. building a savings balance of $\$ 14,045 \ldots$

- Or grow savings to $\$ 21,132$ earning $\$ 354$ in interest at $2 \%$ ?

## Choose the first option and . . .

- The mortgage will be paid off in 15 years;
- $\$ 107,915$ in interest payments will be avoided;
- Build $\$ 86 \mathrm{~K}$ in savings in 15 years before taxes and;
- Build $\$ 1.1$ million savings in 29 years!

Solution uses a \$15K Line of Credit at 5\% interest.
